

Erin Johnson Legal

Client Workflow, Current State — Prepared for Tech/AI Consultant Meeting

Purpose: give a fast, accurate picture of how a client moves through EJL today — inquiry through signed, recorded, and archived estate plan — so we can identify where technology, AI, or a paralegal hire would most reduce the load on Erin (our attorney) and the admin bottleneck around her.

Erin Johnson Legal — Client Workflow: Inquiry to Completion

Who touches the 53 tracked steps, end to end:

The Six Stages

53 tracked steps total, spanning two internal boards (Contacts → Estate Planning) in Monday.com, plus LawPay, Gmail/Voice, Google Drive, Gavel, Tapestry.com, Simplifile, and Adobe.

1. Inquiry → Consult

#	Role	Task
1	Admin	Respond to inquiry/client emails/voicemails within 1 business day
2	Client	Client schedules consult (Calendly / Google Voice)
3	Monday.com	Contact auto-created on "Contacts" board — CL Status: Consult Scheduled
4	Admin	Phone call follow-up if Referral Source is Google — confirm time, directions, pricing seen
5	Admin	Edit Referral Source column to match "Referral Info"
6	Admin	Review referral source for new names to add to EJL Friends board
7	Monday.com	Automated email: "Preparing for your upcoming consultation"
8	Admin	Create client contact/case in LawPay (name and email)

2. Consult → Deposit

#	Role	Task
9	Erin	CONSULT
10	Admin	Create Consultation Fee invoice / receive payment during consult (probate, premarital, non-retainer cases)
11	Admin	Deposit paid at end of consult, or email deposit request via LawPay (confirm total with Erin)
12	Erin	Emails consult notes to be uploaded into Client File
13	Admin	Upload intake notes to Drive (New Intakes)
14	Monday.com	CL Status auto-switches to "Purgatory"; 45-day countdown starts; auto-reminder on day 45; moves to "No Hire" if unpaid
15	Erin	Advises if/when Fee Agreement and/or Retainer Request needs to be sent
21	Client	CLIENT PAYS DEPOSIT

3. Deposit → Drafting

#	Role	Task
22	Admin	CL Status changes "Purgatory" → "Onboarding," case moves to EP Board
23	Monday.com	2 weeks after "Drafting" status: automated Fillout email collecting Contingent Distribution
24	Admin	CL Status changed to "Drafting"
25	Monday.com	Automated email: "Thank you! Deposit Received for Your Estate Plan"
26	Admin	Remove "Date of Consult" to make room for "Date of Signing"
27	Monday.com	Auto-fills "Date Deposit Paid" column
28	Monday.com	"Date Deposit Paid" auto-fills "Days Since Deposit Paid" column
29	Monday.com	Auto-fills "4 weeks from deposit" date column

4. Drafting → Review → Client Delivery

#	Role	Task
30	Admin	Create client file ("Last, First") in New Intakes folder; move notes in
31	Admin	Move Client File from New Intakes into main Estate Planning folder
32	Admin	Enter consult notes into Gavel to generate drafted EP documents; save to Drive
33	Admin	Search Tapestry.com for client's prior deed (client as grantee); save to Drive
34	Admin	CL Status changed to "Edit" once Gavel drafts are uploaded
35	Jackie	Edits Gavel drafts; changes CL Status to "Review"

#	Role	Task
36	Erin	Reviews drafts for approval
37	Erin	Changes CL Status to "Email Drafts" once editing is finished
38	Admin	Emails EP drafts to client (cc Erin) — combined PDF via Adobe

5. Signing Scheduling

#	Role	Task
39	Admin	CL Status moved to "Signing" / "Documents Sent"
40	Monday.com	"Signing Switch Date" set, pushed 2 weeks out; status → "Schedule Signing"
41	Admin	If no signing scheduled: 2-week reminder email with Calendly link
42	Admin	If no signing scheduled: 4-week reminder call, offer to book by phone
43	Client	SIGNING SCHEDULED

6. Signing → Completion

#	Role	Task
44	Admin	"Date of Signing" field updated
45	Erin	Updates "If signing, ready to print?" column
46	Admin	Prepare printed documents, place in black folder
47	Admin	Send final invoice in LawPay, print for black folder
48	Admin	File black folders in date order (bookshelf/cabinet)
49	Client	SIGNING APPOINTMENT
50	Admin	Ensure final invoice paid in person if still outstanding
51	Admin	Scan signed docs (deed separately); staple/paperclip originals into black folder
52	Admin	Email scanned copies to client (template)
53	Admin	Upload/e-record signed deed via Simplifile
54	Admin	Email recorded deed copy to client (template)
55	Admin	Move client folder to "ZZ Complete"
56	Admin	Update CL Status to "Complete"; flag home exemption if needed
57	Monday.com	Automated Thank You + Feedback form email
58	Admin	Handwrite and mail thank-you postcard

Where Erin's Time Actually Goes

Of the 53 steps, Erin is the named actor on only 6 — but each is a legal-judgment step that can't be templated away: the consult itself, relaying accurate notes, advising on fee agreements, reviewing drafts for approval, signing off to send drafts, and confirming documents are ready to print. Everything else is either admin execution (32 steps) or Monday.com automation (10 steps).

- Consult (#9) and draft review/approval (#36) are the two steps most tied to her legal expertise specifically.
- Notes relay (#12), fee-agreement timing (#15), draft sign-off (#37), and print-ready confirmation (#45) are judgment calls today, but are candidates for a paralegal to draft/flag for her quick approval rather than her doing them start to finish.
- The 32 admin steps (referral tagging, LawPay, Drive filing, Gavel entry, Tapestry lookups, Simplifile e-recording, client emails) are the volume load — this is where hiring and/or AI-assisted automation has the most room to move.

Questions for Today's Conversation

- Which of the 32 admin steps are the best near-term automation or AI-assist candidates (e.g., Gavel entry, Tapestry deed lookups, drafting client emails)?
- Would a paralegal hire best absorb the admin volume, the judgment-adjacent steps (notes relay, print-ready checks), or both?
- Are there tools that could shorten the review loop between Jackie's edits (#35) and Erin's approval (#36)?
- Where is Monday.com automation already doing enough, vs. where could AI add real judgment (e.g., flagging referral sources, drafting reminder language)?
- What about intake form (Remarkable), gavel.io, Google Drive as tech stack for drafting? Room for AI?
- How can consult prep speed up the process?
